NEEDS AND USES: The primary purpose of collections to be conducted under this clearance is to provide data which will be used in conjunction with other information to derive numerical values of certain evacuation behaviors which in turn will be used in transportation modeling of evacuation clearance times, along with shelter planning and public outreach. In general all collections under this clearance will be designed based upon accepted statistical practices and sampling methodologies, will gather consistent and valid data that are representative of the target

population, address non-response bias issues, and achieve response rates needed to obtain statistically useful results.

AFFECTED PUBLIC: Residents, property owners, businesses, nongovernmental organizations, Local Governments.

ANNUAL BURDEN HOURS: 1,500.

NUMBER OF RESPONDENTS: 6,000.

RESPONSES PER RESPONDENT: 1.

ANNUAL RESPONSES: 6,000.

AVERAGE BURDEN PER RESPONSE: 15 minutes.

FREQUENCY: On occasion.

Respondents are residents living in coastal areas where public officials may call for an evacuation when a hurricane threatens. The sample population queried in this generic collection is typically identified using available hurricane risk data, including data on areas at risk from hurricane storm surge flooding, previous hurricane evacuation studies or hurricane response plans, established hurricane evacuation zones, and in coordination with State and Local governments within the study area who are responsible for hurricane emergency management and evacuation decision making.

Dated: October 7, 2019.
